Professional Summary

Data professional with an MSc in Data Science & Analytics and experience across AI operations, digital consulting, and client-facing roles. Strong at turning ambiguous problems into structured solutions using data, clear thinking, and collaboration. Known for reliability, ownership, and the ability to stay effective in fast-moving environments. Looking to contribute to product teams by combining analytical skills, customer understanding, and execution focus to build useful, scalable products.

What I Bring to a Product Team

- ✓ Ability to break down unclear problems into actionable plans
- ✓ Strong data skills to support evidence-based decisions
- ✓ Clear communication across technical and business stakeholders
- ✓ Ownership mindset — comfortable managing work end-to-end
- ✓ Customer-first thinking shaped by real client interaction
- ✓ Adaptability from working across diverse roles and environments

Core Skills

Product management skills: Product Management, Product Strategy, Product Development, Product Lifecycle Management, Product Road mapping, Feature Prioritization, Backlog Management, User Stories, Acceptance Criteria, Requirements Gathering, Product Documentation, Go-to-Market Strategy, Product Analytics, Customer Discovery, User Research, Product Vision, Product Launch, Product Planning, Product Operations, Product Thinking

Agile & delivery: Agile Methodologies, Scrum, Kanban, Sprint Planning, Sprint Reviews, Retrospectives, JIRA, Confluence, Cross-Functional Team Leadership, Iterative Development

Business & analysis: Business Analysis, Process Improvement, Business Process Mapping, KPI Tracking, Performance Analysis, Strategic Planning, Operational Efficiency, Market Analysis, Competitive Analysis, Risk Assessment

Data & analytics: Data Analysis, Data Interpretation, Data-Driven Decision Making, Exploratory Data Analysis (EDA), Statistical Analysis, Predictive Analytics, Data Visualization, Dashboard Development, Reporting & Insights, Data Cleaning

Programming & databases: SQL, Python, Pandas, NumPy, R Programming, Database Management, Data Querying, ETL Basics, Relational Databases, Data Modeling

BI & visualization tools: Power BI, Tableau, Microsoft Excel, Advanced Excel, Pivot Tables, VLOOKUP, Data Presentation, Business Intelligence

Machine learning: Machine Learning, K-Means Clustering, Natural Language Processing (NLP), Model Evaluation, Data Mining

Customer Related: Customer Experience, Customer Insights, User Needs Analysis, Problem Solving, Design Thinking, Usability Awareness, Customer Journey Mapping

Project & operations: Project Management, Project Coordination, Stakeholder Management, Time Management, Resource Planning, Vendor Coordination

Soft skills: Communication, Leadership, Team Collaboration, Critical Thinking, Decision Making, Adaptability, Conflict Resolution, Multitasking, Attention to Detail, Negotiation

Entrepreneurial & business ownership: Entrepreneurship, Client Relationship Management, Business Development, Consulting

Education

Master of Science – Data Science and Analytics

University of Hertfordshire | Sep 2021 – Sep 2023

Bachelor of Engineering – Computer Science and Engineering

Jawaharlal Nehru Technological University | Jun 2014 – Jun 2018

Projects

Sales Performance Dashboard

- Analyzed retail sales data to identify top-performing regions, categories, and monthly trends.
- Built interactive dashboard using Excel/Power BI to visualize key business metrics.
- Generated actionable insights to support revenue optimization and business metrics.
- Applied data cleaning and transformation techniques to ensure reporting accuracy.

Customer Segmentation Analysis

- Performed customer clustering using Python to segment customers based on income and spending behavior.
- Identified high-value customer groups to support targeted marketing strategies.
- Visualized customer segments using Matplotlib and Plotly.
- Provided Business recommendations to improve customer retention.

Text Summarization Using Pre-Trained Models

- Implemented NLP models (BERT, BART, T5, GPT-2) for automated legal text summarization.
- Evaluated model performance using ROUGE metrics
- Built data preprocessing pipelines for large textual datasets

Experience

Founder & Digital Consultant

Pole Digital Solutions · Freelance (Remote) | Sep 2024 – Present

- Founded a small digital services venture delivering websites and analytics support for small businesses
- Successfully completed multiple projects for local businesses, improving their online presence and accessibility
- Led projects end-to-end — requirement discussions, planning, execution, and delivery
- Built business websites that increased client visibility and customer engagement
- Used analytics insights to guide marketing and operational decisions
- Managed timelines, scope changes, and client expectations across concurrent projects

Key Achievements

- Delivered projects independently without external team support
- Maintained positive client relationships leading to repeat work and referrals
- Demonstrated entrepreneurial ownership, decision-making, and accountability

Operations & Client Services Associate

Savills, London · Part-time | Jul 2023 – Aug 2024

- Supported daily operations across 75+ commercial and residential sites in a high-volume environment
- Coordinated hundreds of visitors, vendors, and stakeholders weekly to ensure smooth functioning
- Resolved issues quickly while maintaining professional service standards
- Managed scheduling, reporting, and administrative coordination tasks
- Worked in a fast-paced setting requiring constant multitasking and prioritization

Key Achievements

- Recognized for reliability and ability to handle high-pressure situations calmly
- Built strong communication skills working with diverse international stakeholders
- Maintained operational continuity across multiple locations

Senior Associate – AI Data Operations

Wipro Limited, India · Full-time | Feb 2019 – Sep 2020

Worked on the Waymo self-driving car project, performing high-precision annotation of 3D LiDAR point cloud data to support training and validation of AI/ML perception models. Operated within a high-performance team in a fast-paced, accuracy-driven environment to meet aggressive production goals. Contributed to annotation processes that supported the training and validation of machine learning models used in autonomous vehicle perception systems.

Key Responsibilities:

- Worked on large-scale data preparation for autonomous vehicle systems using LiDAR, image, and video datasets
- Ensured high data accuracy by identifying and correcting inconsistencies
- Collaborated with team members to meet strict project deadlines
- Trained new associates on tools, processes, and quality standards
- Contributed suggestions to improve workflow efficiency

Key Achievements

- Onboarded and trained 60+ associates, improving team productivity and consistency
- Maintained high-quality output in a fast-paced AI data pipeline
- Helped reduce errors through proactive quality checks and process improvements

Certifications

Learn Tableau for Data Visualization – Codecademy

Learn SQL – Codecademy

Excel for Data Analysis – Codecademy

Learn Python 3 – Codecademy
